

What is MyDigital ID in Malaysia?

A: MyDigital ID is Malaysia's secure national digital identity platform designed for safer online transactions and easy access to government and private services. It provides a **single sign-on (SSO)** feature to simplify digital interactions, reduce the risk of identity fraud, and strengthen security through the use of **cryptography and device-specific certificates**—not by storing personal data.

The service is accessible via a **mobile application** and is being integrated into platforms such as **MyJPJ** and **MyBayar PDRM**. Soon, the use of MyDigital ID will become mandatory for these services to ensure **secure and uninterrupted access**.
