Login to the site

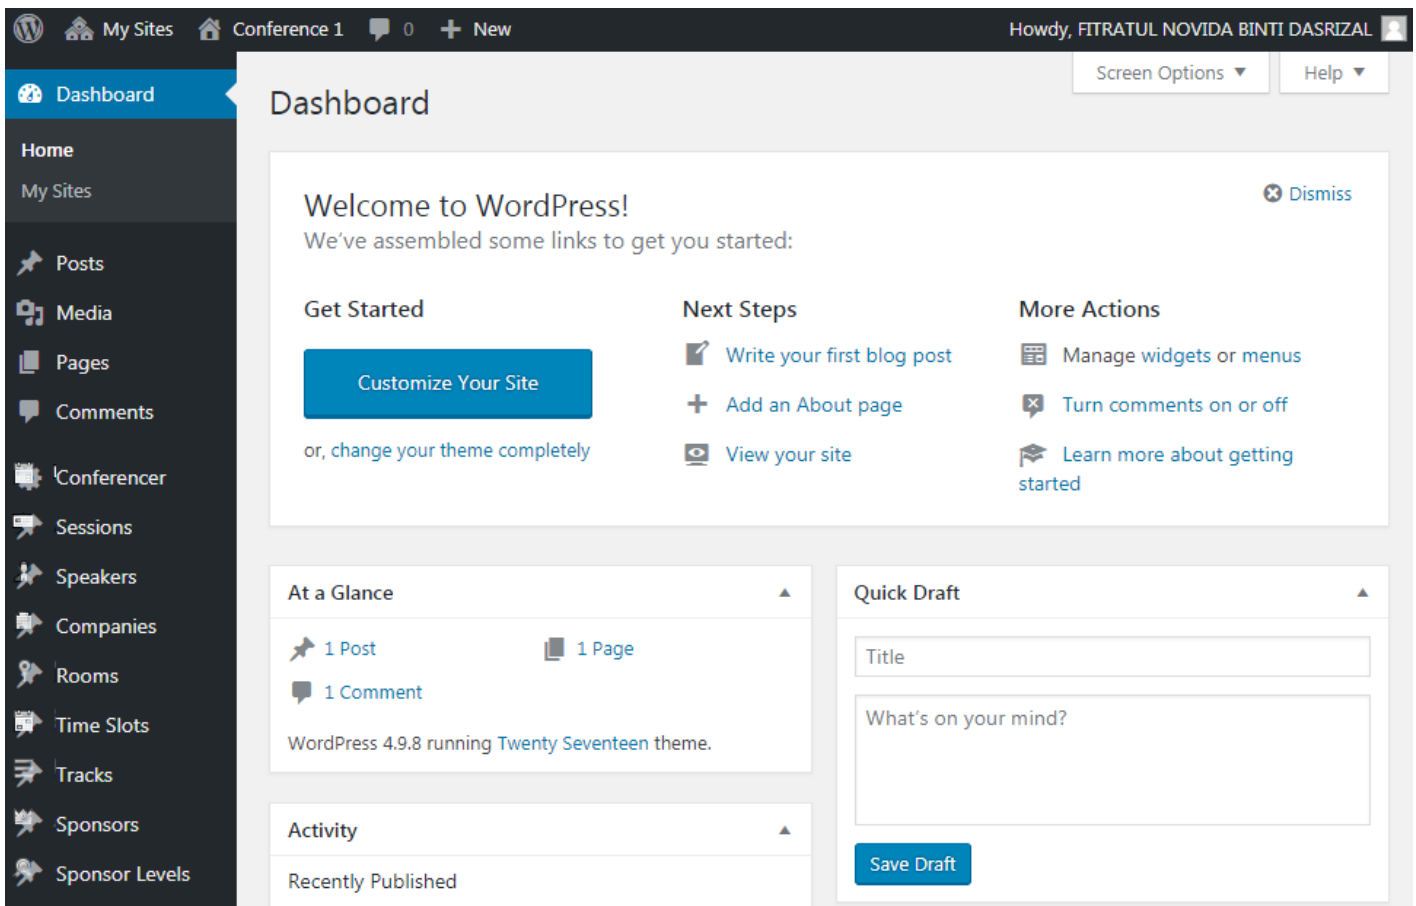

Alternatively, for IIUM staff, the system integrate with Single Sign On (CAS). Kindly click Sign in with CAS button to login. Enter your credential using your email ID and password (HURIS)

The diagram illustrates the login process for the International Islamic University Malaysia (IIUM) using CAS (Central Authentication Service). On the left, a WordPress login page is shown with the WordPress logo at the top. Below the logo, there is a blue button labeled "Sign in with CAS" with a lock icon. Below this button, there is a separator "— or —" and a form with two input fields: "Username or Email Address" and "Password". There is also a "Remember Me" checkbox and a "Log In" button. A purple arrow points from the "Sign in with CAS" button to the right-hand page. The right-hand page is the CAS login page for IIUM. It features the IIUM logo and name in Arabic and English at the top. Below the header, there are input fields for "Username:" and "Password:". A green "LOGIN" button is positioned below the password field. At the bottom of the page, there is a security notice: "For security reasons, please [log out](#) and exit your web browser when you are done accessing services that require authentication!". The footer of the page states "Copyright © 2005–2017 Apereo, Inc. Powered by CAS 5.2.4".

For external users, kindly login with your username or email address and password to login. This is setup by the staff administrator for that site.

This is a screenshot of the WordPress login page. The WordPress logo is at the top. Below it is a blue button labeled "Sign in with CAS" with a lock icon. Below this button is a separator "— or —". Below the separator is a form with two input fields: "Username or Email Address" and "Password". There is also a "Remember Me" checkbox and a "Log In" button. The entire login form area is highlighted with a purple border.

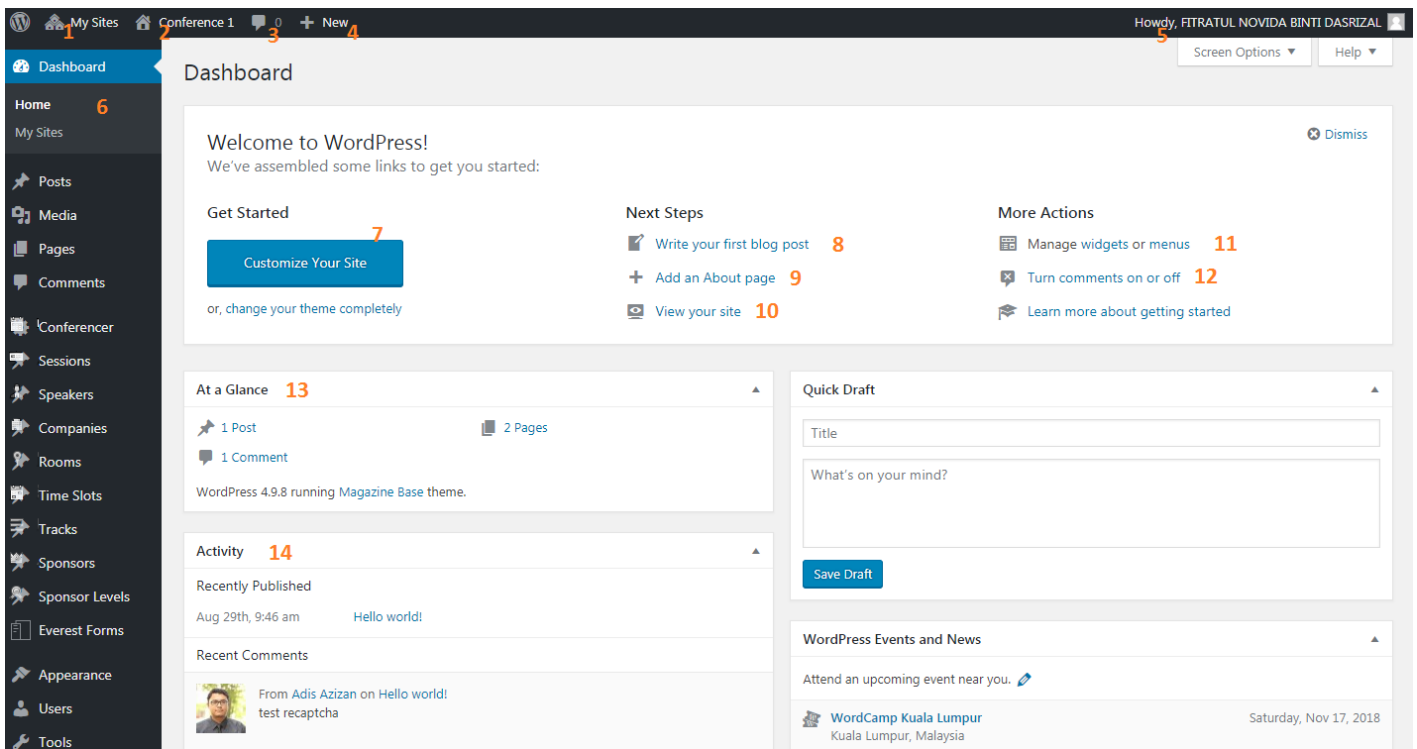

You may view the Dashboard page as below.

Dashboard

Figure below shows the dashboard of the site. All the setting can be done here.

1. View all sites that have been created and managed by user.
2. View user site
3. View comment
4. Create new page. Post or others
5. View user profile
6. Site Menu to manage user site
7. To customize your site for example changed theme
8. User may write their first blog post
9. User may add an About page
10. User may view their site
11. User may manage site widget or menus
12. User may turn the comments on or off
13. View total number of post, pages and comment that have been created
14. View the site activity
